Key

Italics: *Shortcomings noted during inspection*
Bold: **Issues noted during re-inspection and sub-headings**
Regular: The rest of the body of the inspection

1.0 Preamble

This was a routine inspection of the premises last inspected on the 6th of March 2024, as a routine inspection and the following shortcoming was noted:

- There was no temperature monitoring device in the refrigerator.

1.1 Suitability of Premises

The premises consisted of the following rooms;

- a) Out-patients/ waiting area
- b) Maternity ward
- c) Operating theatre
- d) Consultation room (acting as the dispensary as well)
- e) Nurses' room
- f) General ward
- g) Kitchen

The premises were clean and tidy with a tiled floor, and the walls were painted white washable paint. There was adequate natural lighting and ventilation. There was adequate artificial lighting in the consultation room where the medicines were stored and dispensed from. There was a lockable medicines cupboard in the consultation room where medicines were kept out of reach of the public. All surfaces were finished with smooth and impervious material and kept in a good state of repair. The staff complement comprised one (1) doctor and six (6) nurses.

1.1 Waiting area

There was a waiting area at the reception and seats were available. There was adequate space in the waiting area for clients. The area was generally clean and tidy. Valid MCAZ licenses were displayed in the waiting area.

1.2 Consultation room

There was one consultation room with adequate working space. There was a double stainless-steel sink with provision for running water, a table, and a lockable drugs storeroom.

1.3 Drug store

Injectables were kept in the treatment room in a lockable metal drug trolley. Non-injectable medicines were stored in locked metal cabinets with metal shelves in the same room. There was also a grey, upright, single door Capri® refrigerator for storage of cold chain medicines. The temperature of the refrigerator was monitored using an analogue Mercury thermometer which read 2°C at the time of the inspection. The refrigerator was clean and there were no food items in the fridge. Temperature records were reviewed, and no temperature excursions were noted. There was a fixed double lockable Dangerous Drugs cabinet in the consultation room.

There was one (1) bound book with serialized pages for use as a Dangerous Drugs register.

1.4 Dispensing Equipment

There were two (2) plastic 100ml measuring cylinders labelled for their intended use. There was one (1) counting tray and spatulas. A weighing balance as well as a mortar and pestle were not available. The supervising doctor highlighted that they do not compound preparations.

1.5 Prescription Records

The following was noted:

1. There was adequate space for dispensing and similar operations
2. There was a single stainless-steel sink with provision for running cold and hot water in all the rooms at the clinic.
3. There were two (2) counting trays and spatulas for counting tablets and capsules.
4. There were no measuring cylinders. The supervisor was advised to acquire at least two (2) measuring cylinders for measuring liquid preparations. These should be either 100ml or 50ml. These should be labelled for their respective uses (*Medicines and Allied Substances Control (General) Regulations, SI 150 of 1991, Third Schedule, Section 2(e)*)
5. There was a Capri®, double door grey refrigerator, for storage of cold chain medicines. There was a dial thermometer which read 4°C at the time of the inspection. *However, this was not calibrated, and the supervisor was advised to get the thermometer calibrated. (Ref: Medicines and Allied Substances Control (General) Regulations, SI 150 of 1991, Third Schedule, Section 2d)*

1.6 Control of materials

There were no unregistered medicines at the time of the inspection. There were no expired medicines on the premises. However, the supervisor informed the inspectors that they have a contract with a nearby hospital, Bindura District Hospital, for incineration of expired medicines.

1.7 Reference Material

The following reference texts were available as soft copies:

1. EDLIZ 2020
2. BNF 84th Edition
3. ART Guidelines 2022
4. Martindale

1.8 General

There was a night guard for security, metal grills on all the doors and burglar bars on all the windows.

2.0 Observations

For the observations the reference numbers given below in the right-hand column refer to the relevant references of the Medicines and Allied Substances Control Act, Medicines and Allied Substances Control Regulations and Good Dispensing or Good Wholesaling Guidelines.

Observations are classified into the categories “Critical”, “Major”, “Other (Minor)”

- 2.1 Critical observations are those observations that pose a great risk to the general public
- 2.2 Major observations are those observations which pose considerable risk to the public
- 2.3 Minor observations are those observations which pose minimal risk to the public but are still contraventions to the statutory instruments and departure from the guidelines.

<i>Nr</i>	<i>Observations</i>	<i>Ref</i>
	<i>Critical</i>	
	None	
	<i>Major</i>	
	The thermometer was not calibrated	<i>Medicines and Allied Substances Control (General) Regulations, SI 150 of 1991, Third Schedule, Section 2d</i>
	<i>Minor</i>	
1.	There were no measuring cylinders	<i>Medicines and Allied Substances Control (General) Regulations, SI 150 of 1991, Third Schedule, Section 2(e)</i>

3.0 Recommendations

- The supervisor is recommended to address the shortcoming in italics.
- This was a generally satisfactory routine inspection.
